

FINDING TRAINING

JOIN US FOR TRAINING:

- Pre-training webinars including an introduction to water quality issues and aquatic macroinvertebrates
- How to collect chemical, physical, and biological stream data
- Resources to connect with local biologists
- Ideas on community stream projects including cleanups, outreach programs, and more
- Field materials including identification guides and datasheets

IF WE DON'T HAVE A TRAINING IN YOUR AREA:

- Participate in our pre-training webinars to an introduction to water quality issues and aquatic macroinvertebrates
- Many watershed groups or master naturalists have water monitoring training that have macroinvertebrate identification certifications
- Contact us for assistance in finding a local group that provides training
