

Are you interested in bringing hands-on STEM activities to your students through mission-based water quality monitoring and management?

Save Our Streams (SOS) Club might be the perfect program for you and your students! SOS Club is a high school stream monitoring program. This program is a model for teaching students about **stream ecology and health**, engaging them in **hands-on field experiences**, and giving them the opportunity to **engage with professionals** in the environmental sciences field.

Is SOS Club right for me?

By joining the SOS Club, you will have access to:

- Recorded trainings about water quality topics
- In-person trainings for biological monitoring and more
- American Fisheries Society contacts for professional development and project guidance for students
- The Clean Water Hub Database for data entry
- Connect to a network of schools and volunteers that collect community science data

For more information contact us at sosclub@iwla.org

The TIA Alliance is a project of Trout Unlimited, Izaak Walton League of America, and American Fisheries Society.
